- 5 mm hook
- Four 20 mm buttons
- Tapestry needle

Abbreviations

- ch - chain
- dc - double crochet
- fpdc - front post double crochet
- RS - right side

Instruction preview

Front panel begins with a solid lower band to stop the pillow insert showing through. Texture is introduced only after the base rows are stable.

Back panels are worked separately with an overlap so the cushion can be removed for washing. Button placement is mirrored against the overlap edge.

Joining method: place pieces wrong sides together and work a tidy edging round through both layers, skipping only the overlap opening.

Why buyers trust a good pattern PDF

- Clear row counts reduce support messages.
- Readable spacing makes the PDF feel premium on mobile and print.
- Structured sizing and finishing notes increase buyer confidence.

Licensing and delivery note

Recommended store language: this PDF pattern is for personal use only. Finished handmade items may be sold in small quantities with credit to the pattern designer if that suits your policy.

Preview note: the paid file should include a visual panel map and exact overlap measurements for different insert depths.
